BIKE DETAILING SYSTEM

PROJECT ABSTRACT

AROMAL S VISWAM

REG MCA, S7

ROLL NO:18

ABSTRACT

The main objective of the system is to understanding and identify the motor bike details. Firstly, collect maximum details of the different type of motor bike. The user can check any motor bikes are available in India. The user never get details of the searched motor bike.

First you check whether the bike is available in India or not, if it is available and not in the list, then send a notification to the admin for the details of the bike that you are looking for.

Existing System: The existing system is, travel all showroom of the bikes and collect details from the showroom staff.

Limitations: The existing system take large time, effort and cost.

Proposed System: The Bike detailing system provide good and bad details of the searched motor bike.

Show Genuine review of the bike.

Advantages: Quick search result.

Less time will take for result.

Free of cost.

Conclusion: The bike detailing system will change the feature of bike industry.
